

## A Simple Site – Exercise

Create a folder for you site and create a page (Lab1.html). Include the following code in your page (Lab1.html):

```
<a href="Lab2.html">Hyperlink 1</a>  
<a href="../Labs.html">Hyperlink 2</a>  one level up directory  
<a href="Lab1/Example1.html">Hyperlink 3</a>  
<a href="Lessons.html">Hyperlink 4</a>  
<a href="../Lessons.html">Hyperlink 5</a>  
<a href="/LessonsSummary.html">Hyperlink 6</a>  root folder
```

Create all the necessary subfolders and HTML Files so that all the links in Lab1.html will be valid and place Lab1.html inside the appropriate folder.
